Fidelity Investments
Boston, Massachusetts

Engineer
CCR Pyramid
Wellesley, MA
Keith Batholomey

Contractor
Mahon Communications Corp.
Boston, MA
William Harron

CSD Representative
Field Construction Services
Hopkinton, MA
Joe Feeley

Fidelity Investments took over a 14-story building in downtown Boston and needed to upgrade the communications systems throughout the building. New wire needed to be run between floors, and plenty of room was needed for future expansion. *CCR Pyramid* introduced CSD Sealing Systems materials to the Fidelity engineering staff. All agreed that CSD was the best choice for this job.

Since this building was occupied, the construction was done mostly at night. The holes between the floors needed to be sealed every night before the contractors left the job so the building could be occupied the next morning and remain fire-protected.

Mahon Communications installed the CSD units and sealed the openings with no complications. Each opening took less than two man-hours to complete. In just minutes, the hole could be opened and closed to provide easy access to finish installing the cable.
